

# Liquidator 10

Innovation for a sustainable future

- Tank capacity: 10L
- Hourly operation up to 10 hectares
- Flight planning and flying precision: RTK (included, no need for internet connection)
- Maximum spray flow: 3,6L/min
- Spraying system: CDA (controlled droplet application) low pressure brushless pump, clogging free nozzle, droplet size can be set to exact size according to application. 90% less water, 50% less pesticide, more efficient spraying
- Pesticide tank installation method: quick plugging tank
- Battery installation method: quick plug battery

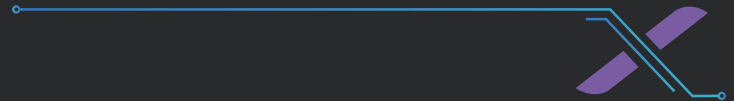

**Drones have a key role in shaping our future. We help you to develop, implement and integrate the right technology.**

- IP54 water and dustproof
- Foldable frame
- Easy flight planning on field
- Effective control signal distance: 8km
- Advanced LIDAR based terrain follow system
- Wheelbase: 1460mm
- Total weight: 17kg including battery
- Take-off weight: 27kg
- Hovering time: 22 minutes with empty tank, 14 minutes with full tank
- Maximum operating flight speed: 7m/s
- Maximum flight speed: 22m/s
- Maximum wind speed: 10m/s
